Built around the work you need done

FirstBlaster provides high-performance dry ice blasting equipment, reliable pellet supply, genuine parts, operator training, technical after-sales support, and flexible leasing options for commercial and industrial operators worldwide.

Why dry ice cleaning

- Non-abrasive cleaning that protects surfaces and tooling
- No secondary waste stream from grit or solvents
- Ideal for molds, production lines, food equipment, and power assets
- Faster turnaround versus many conventional methods

COMMERCIAL / MOBILE

Compact Blasters

Mobile power for precision cleaning in a small footprint.

Key capabilities

- Portable wheeled chassis
- Precision blast control
- Low-consumption hopper
- Quick hose changeouts
- Single-operator setup

At-a-glance specifications

Footprint	Compact mobile
Air	Compressed air
Use case	Commercial / light industrial
Operators	1

INDUSTRIAL PRODUCTION

Heavy-Duty Systems

Uncompromising capacity for high-demand production floors.

Key capabilities

- High-capacity hopper
- Industrial chassis
- Operator console with presets
- Heavy-duty blast hose
- Production-floor durability

At-a-glance specifications

Footprint	Industrial mobile
Air	High-volume plant air
Use case	Heavy industrial
Operators	1-2

INTEGRATED / ROBOTIC

Custom & Automated

Configured around your line, process, and performance targets.

Key capabilities

- Robotic or fixed automation
- Recipe-based process control
- In-line mold and part cleaning
- Plant system integration
- Application engineering included

At-a-glance specifications

Footprint	Cell / line integrated
Air	Plant air + utilities
Use case	High-volume production
Operators	Supervised automation

Services that protect uptime

Every FirstBlaster relationship is designed to keep your cleaning capability online - not simply complete a sale.

Dry Ice Supply

Scheduled pellet replenishment, emergency top-up coordination, and sizing guidance.

Genuine Spare Parts

OEM-spec nozzles, hoses, filters, applicators, and preventive maintenance kits.

Operator Training

Safety, handling, process recipes, and attendance certification for your team.

Technical After-Sales

Remote diagnostics guidance, maintenance planning, and application support.

Leasing & Rental

Short/long-term options, trials, project peaks, and upgrade paths to ownership.

Industries & applications

Automotive	Molds, fixtures, paint prep, assembly tooling
Food & Beverage	Conveyors, ovens, fillers, packaging lines
Electronics	Fixtures, enclosures, production jigs
Aerospace	Tooling, composite molds, surface prep
Plastics & Molds	Injection molds, blow molds, hot runners
Power Generation	Turbine components, heat exchangers, generators
Printing	Press cylinders, anilox rolls, frames

NEXT STEP

Ready for a cleaner process?

Tell us what you need to clean. We will help you choose the equipment, service, and support package that fits.
